

PPA-API: First Public Working Draft

Aram Zucker-Scharff & Sean Turner

PPA-API: First Public Working Draft

tl;dr: Want to adopt PPA-API as FPWD (First Public Working Draft).

WG charter lists Private Attribution Measurement as a committed deliverable.

PPA-API has gone been incubating at the PATCG.

<brief interlude summarizing PPA-API: aka putting Andy, Martin, and Ben on the spot>

PATCG has consensus to transfer the PPA-API Repo to the PAT.

Consensus Call: Do you support adopting PPA-API as the FPWD (and accepting the to the repo)?

Auto-Publish

tl;dr: Propose that we auto-publish new Working Drafts based on merged updates.

Auto-Publish: Changes to the repo automatically reflected in public HTML version.

Consensus Call: Should the PAT auto-publish based on merged updates?
